To figure an inmate's actual bail amount use the following examples as a guide:

When an inmate is booked for multiple felony charges the bail will be the amount from the single highest charge. Example: If booked for 273.5(a) PC (felony) with a \$15,000.00 bail and 11377 H&S (felony) with a \$10,000.00 bail, the total bail amount would be \$15,000.00 (not stacked).

When an inmate is booked for multiple charges including felonies and misdemeanors, the amount will again be the single highest felony bail amount.
