

Appendix F**Decommissioning – Numerical Assessments**

Contents of Appendices B, C, D and E are evaluated numerically for each site and prioritized with a progressive decommissioning matrix.

This Appendix F summarizes the weighted score in each of the 29 categories that were evaluated. The weighted scores are indicated for each facility as well as the total raw score for each facility, analyzed by each District. The weighted score cutoff points to separate in three categories were 3550 and 2250. A total weighted score above 3550 received a green category, while those below a 2250 received a red category. The facilities scoring from 2251 to 3549 received a yellow category.

Each of the facility is color-coded for the three categories as follows: Beginning 2007 for the next ten years, the red colored facilities need to be decommissioned first. The yellow colored facilities need to be decommissioned thereafter. The green colored facilities may be held back for a final evaluation until the red and yellow colored facilities have been addressed. While the replacement facilities are built over the next ten years, all three categories need to stay functional with appropriate repairs and maintenance.
