

Appendix H – Replacement Facility Requirements
--

Appendix H Replacement Facility Requirements

Appendix H is a follow-up of Appendix G which presented the Integrated and Structured planned Replacement of Tiered facilities. The appendices H1, H2, H3 and H4 and H6 provide a cumulative assessment of existing conditions in the justice system. Prior appendices B, C, D, E and F provided an assessment of the programs and facilities of a sampling of Tribal, PL 638, Self Governance and BIA facilities. These appendices B, C, D, E, F, G, lead into these appendices which in H5 presents the requirements for the planned replacement facilities and Capacity Upgrade of existing facilities.

Appendix H 1 – Service Calls and Arrests in 24 hour period

This appendix tabulates the number of service calls received in a 24 hour period. Note the striking disproportionate number of arrests that are made for the number of calls that are received in the 24 hour period.

Appendix H 2 – New Bookings and Already Housed Inmates

Once arrested, inmates are booked and/or released based on available food and bed space. Typically already housed inmates are released to make room for new arrivals. Often the numbers of new arrivals overwhelm the available capacity making for a high turnover rate. An unwritten understanding of either not arresting, not booking, housing for a few hours, or not housing at all is prevalent – to circumvent appropriate available housing for inmates.

Appendix H 3 – Under-reported Inmate Over-crowding, one-day sampling

Number of inmates housed often exceeds the bed capacity, at times of up to five times the capacity. Consent court decrees are often violated. Inmates are often released at dawn, before the formal inmate count is taken. Number of inmates housed is often under-reported to management for fear of a potential closing down of a facility.

Appendix H 4 – Jails in Indian Country operating above 150% of Capacity on the peak day during June 2004

This appendix is a reference from the U. S. Department of Justice, Bureau of Justice Statistics, Bulletin, "Jails in Indian Country, 2004" November 2006, NCJ 214257. As of September 12, 2007, Mr. Todd D. Minton of the DOJ, indicated that they do not have more information that is more recent than that provided in this reference.

Appendix H – Replacement Facility Requirements
--

Appendix H 5 – Replacement Facility Requirements 2007 – 2017

This appendix tabulates the needs for replacement facilities to replace the existing facilities over the next ten years for needs in Indian Country. These facilities are expected to last over the next forty years or more.

Data on the crime rate and the incarceration factor for 2007 is included from Appendix H6 for a comparison to the projected incarceration factor for 2017. The incarceration factor for 2017 – about 38% of incarceration factor of 2007, together with the projected service population for 2017 provided a projected inmate population for 2017.

The tabulation in Appendix H5 includes the existing bed capacity, known overcrowding, known 25% extra bed needs held back by judges, 2000 census, service population for 2007 and projected service population for 2017, projected inmate population for 2017.

The size, capacity and locations for Tier I, Tier II and Tier III and the need for Capacity Upgrades were based on the collective preponderance of information derived from the projected inmate population for 2017, needs for law enforcement, needs for courts in addition to video courts (interconnected to tribal courts) in Tiers I and III, remoteness of location combined with the availability of housing to attract long-term employees.

Appendix H 6 – Crime Statistics 2007

This appendix provides crime rate for 1) Violent Crime, 2) Property Crime and 3) All Other Crime. The Crime Rate per 100,000 inhabitants is very high. This data does not include about 50% unrecorded/released offenders and yet another 25% offenders held back by the judges.

An incarceration factor was developed in Appendix H6 based on the reported crime data. This factor though high would be higher if the unreported and 'un-housed inmates' were considered in this calculation.

Data from 1) Violent Crime, 2) Property Crime and 3) All Other Crime and the Incarceration Factor for 2007 is reported back into Appendix H5 to provide a comparison with the Incarceration Factor used for 2017.

The data includes 68% or 164 agencies that reported.

The physical locations of the Deferred Repairs and Maintenance facilities, Capacity Upgrades facilities, and planned Tiers I, II and III facilities are mapped out in Appendix O and their initial capital costs, facilities' operations and maintenance costs and Program costs are noted in Appendix N.
